EDUCATION

MEARN Stack Web Devlopment
Luminar Technolab, Kochi

09/2023 - Present

B.Tech in Mechanical Engineering
SNGIST, Manjali

06/2018 - 05/2021   *7.75/10 -CGPA*

PERSONAL PROJECTS

Media Player
- Engineered a React.js-based web application with a JSON-server backend to provide users with a seamless media playback experience.
- Implemented features for efficient media file management and playback, focusing on simplicity and user satisfaction.
- github link: ⍈
- website link: ⍈

Project fair
- Developed a React.js frontend coupled with a MongoDB, Express, Node.js backend for a full-stack web application.
- Enabled user authentication for project management, allowing tasks like adding, editing, or deleting personal projects and creating profiles. Utilized middleware and multer for efficient data processing.
- github link: ⍈
- website link: ⍈

Netflix Clone
- The React Netflix Clone is a web application modeled after the widely popular streaming service, Netflix.
- Built with React.js for the frontend and leveraging API fetch to retrieve data from a backend service, the goal is to accurately replicate the core functionalities and user experience of Netflix.
